## **DETAILED ACTION**

### ***Response to Amendment***

Applicant has amended claims 1 and 2. A new drawing objection and a new 112 rejection are made. Examiner regrets the indication of allowable subject matter in the previous office action, since these issues were present in the case at that time. As a result of the new rejection and objection, this action is non-final.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, “the two lateral walls each comprising an opening, at the level of each hollow and over the whole of their height” must be shown or the feature(s) canceled from the claim(s). Examiner notes the lateral walls do not appear to have an opening at the hollows, rather the walls end as they reach the hollows. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 3653

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the language, "two lateral walls each comprising an opening, at the level of each hollow and over the whole of their [lateral wall] height..."

This language is unclear since it how the opening is over the whole of the lateral walls height.
